

Engineering that moves harvest PALM CABLEWAYS

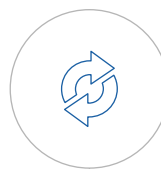

We design, manufacture and install complete cableway systems with several solutions in cultivations such as bananas, oil palm FFB, flowers, avocados, citrus and more. The work side by side with our customers is fundamental so we offer after sales service and permanent contact, instructing our clients in proper operation and maintenance. Our mission is to give our customers the most cost effective solution in the field.

WHY US?

COMPLIANCE

Centro Aceros delivers full projects from quoting to engineering design, production, installation, maintenance and after sale service.

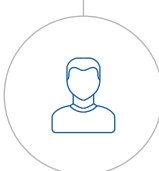

BEST COST-BENEFIT OFFER

Centro Aceros offers comprehensive solutions with high ROI, associated with better product quality, productivity and fruit losses reduction.

CONTINUOUS SUPPORT

Our sales and technical personel are your strategic partners, helping you in all your projects keeping in mind your company's best interests.

REPUTATION AND BRAND VISIBILITY

More than 30 years of experience and innovation has made Centro Aceros world leader in local and internacional markets

LOAD AND WEIGHING PLATFORM

This platform increases the cableway efficiency in this important task taking control of production and speeding up the transport process to the extract plant.

MOTORIZED CABLE TRACTOR

We offer these machines for carrying the harvest and supplies, besides we provide equipment like trolleys, separators, and meshes in order to optimize the fruit transportation. This motorized cable tractor can carry 7 tons on lands with 0% slope.

LOW MAINTENANCE COST

Cableways have lower operational costs the conventional roads because it requires less people, fuels, lubricants, filters and tires.

Besides the maintenance investment is very small (between 2%-4% of initial investment for year).
