

Engineering that moves harvest PACKINGS PLANT BUILDINGS AND EQUIPMENT

We design, manufacture and install comprehensive solutions for the transport of the harvest (avocado, citrus, banana, oil palm, flowers), with an after-sales service and permanent support, ensuring the initial return on investment.

WHY US?

COMPLIANCE

We deliver full projects from quoting, engineering designs, production, installation and maintenance and service.

BEST COST-BENEFIT RELATIONSHIP

Centro Aceros offers comprehensive solutions with ROI, associated with process productivity, product quality and fruit loss reduction.

CONTINUOUS SUPPORT

Our sales and technical people are your strategic partners, helping you in all your projects, always having in mind to create value for you and your Company.

EXPERIENCE AND TRUST

We are world leaders. More than 30 years of experience make us the benchmark in local and international markets.

Adaptability according to customer needs

We study the particular needs of the client in order to design, manufacture and install the most efficient and optimal solution for the plantation, taking into account the volume of boxes produced per day. We have building designs and packing equipment from 1k.

Materials that guarantee quality

Our packing equipments are made of materials resistant to corrosion and continuous use, with smooth finish surfaces, without pores or defects that can trap particles or microorganisms. They are easy to clean, disinfect and inspect, which guarantees the safety and quality of the product during the packaging process.

Easy assembly

Our structures and equipment are modular allowing them to be easily assembled and no field welding required. Likewise, this makes it possible to carry out different configurations according to what is required by the client.

After Sales Service

We guarantee a complete inventory of spare parts kits, to ensure the continuous operation of the equipment. Likewise, we have a team of highly qualified collaborators to carry out installations, maintenance and operation audits.
